YOUR RAINTRAP® APPLICATOR IS:

HAVE THE **RAINTRAP®**
S-LOCK GUTTER
PROTECTION SYSTEM
INSTALLED ON YOUR HOME
AND ELIMINATE HAZARDOUS
GUTTER CLEANING!

**WHY INSTALL
RAINTRAP® S-LOCK
ON YOUR HOME?**

- 🍂 Prevents trash from clogging gutters or gutter guards.
- 🍂 The appealing low profile design has an attractive clean look.
- 🍂 NO more hazardous gutter cleaning—Nothing larger than $\frac{3}{32}$ " can enter your gutters.
- 🍂 Helps prevent water damage to your home's exterior and foundation.
- 🍂 Helps control the mosquito population.

**GREAT LOOKS &
PERFORMANCE!!!**

- A = New! Exclusive drip guard channel, doubles as an optional de-icing coil retainer.**
- B = The leading radius uses surface tension to draw water into the slots**
- C = The opening is only $\frac{3}{32}$ " - keeping out any significant debris**
- D = The trailing radius eliminates any sharp edges so leaves slide off**

**RAINTRAP®
ADVANTAGES**

1. Is available in many colors to blend well with your roof and gutters.
2. Adapts to a variety of gutter and roof combinations.
3. Made of rigid metal that resists buckling and prevents birds and squirrels from chewing through them.
4. Will not clog or collapse like screens or plastic guards.
5. Has a smooth surface so debris will slide off.
6. Is secured without fastening to the roof so it does not violate your roof warranty.
7. Does not have a flat or recessed surface which will collect trash.
8. Handles larger volumes of water than most other systems.
9. Openings on the top surface are small enough to keep significant trash from entering the gutter, but large enough to prevent tree sap, dirt and mold from clogging the cover.
10. Fits securely around end caps to keep small birds and rodents from nesting in your gutters.
